Cryptologic Mission Reductions.

1974/1. In response to the request in your memorandum of 24 April  
~~1973~~, I have tasked the USIB SIGINT Committee to review SIGINT  
reporting decrements proposed by the DIRNSA/CHCSS for FY 1975, as  
outlined in references B and C, above.

2. Recognizing the fiscal and manpower constraints we are facing,  
the total Community must critically review requirements levied against  
NSA. As the Department of Defense USIB member for substantive  
intelligence matters, the DCI looks to you for the definition of  
essential SIGINT information requirements for all DoD elements.

(b) NSACSS Message DTG 040118Z, May 1974,  
Cryptologic Mission Reductions.

1. As a result of manpower reductions in the Consolidated Cryptologic Program (CCP), the Director, National Security Agency has proposed SIGINT reporting decrements as outlined in the references. The decrements affect SIGINT customers in several Agencies and Departments. Consequently, it is necessary to assess the impact of NSA's proposed changes on the total community, including Operating consumers. Therefore, I request the SIGINT Committee review SIGINT reporting decrements proposed by NSA.

2. Your review should include, among other things, a critical look at the basic requirements now being responded to by reports proposed for elimination. Should you find, in the course of the review, that trade-offs are appropriate, I am sure the DIRNSA would welcome the identification of other reports which may be eliminated.

3. It would be helpful if the Committee would accomplish the review as a matter of urgency in order that your report and recommendations may be acted on by the USIB at an early date.
